PROFESSIONAL SUMMARY

Cybersecurity graduate (PGCP-ITISS, CDAC-ACTS Pune; B.Tech CSE) with hands-on SOC and cloud security experience. Built a Wazuh-based home SOC lab, simulated SSH brute-force attacks, troubleshot a log-source misconfiguration that was suppressing alerts, and wrote a formal incident report. Also built an automated AWS incident-response pipeline (GuardDuty, EventBridge, Lambda) that isolates compromised EC2 instances and captures forensic snapshots. Seeking an entry-level SOC Analyst or cloud security role.

TECHNICAL SKILLS

Detection & Response: SIEM (Wazuh), log analysis, incident response, incident reporting, threat detection

Cloud Security: AWS (GuardDuty, EventBridge, Lambda, EC2, EBS, SNS, IAM, CloudWatch Logs)

Networking & Tools: TCP/IP, DNS, Firewalls, Nmap, Wireshark, Hydra

Systems & Scripting: Linux Administration, Bash, Python, Windows, VirtualBox/VMware

Other: Git/GitHub, MySQL

PROJECTS

Home SOC Lab: Detection & Incident Response

Link: - github.com/Ashu-ye/home-soc-lab

- Built a self-hosted SOC lab in VirtualBox with a Kali attacker, an Ubuntu victim, and a Wazuh SIEM.
- Simulated SSH brute-force attacks with Hydra and Nmap, achieving correlated detection of 600+ authentication failure events.
- Diagnosed and fixed a Wazuh agent log-source misconfiguration that was suppressing alerts, and documented the troubleshooting steps.
- Wrote a formal SOC-style incident report and published the full build and troubleshooting log on GitHub.

CloudGuard: Automated AWS Incident Response

Link: - github.com/Ashu-ye/Cloud-Guard

- Built an event-driven pipeline (GuardDuty → EventBridge → Lambda) that contains suspicious EC2 activity automatically.
- Automated forensic EBS snapshots and security-group isolation, with Amazon SNS alerts and CloudWatch Logs monitoring.
- Wrote Python/boto3 orchestration with idempotency checks and dry-run safety controls so responses can be tested and rerun safely.

Vulnerability Scanner

Link: - github.com/Ashu-ye/Vulnerability-Scanner

- Built a multithreaded Python scanner (standard libraries only) for port scanning, banner grabbing, and security header audits.
- Integrated live CVE lookups against the NVD database to map detected services to known vulnerabilities.

EDUCATION

Post Graduate Certificate in IT Infrastructure, Systems and Security (PGCP-ITISS)

Feb 2026 – Aug 2026

CDAC-ACTS, Pune | 75.36%

B.Tech in Computer Science and Engineering

Aug 2019 – July 2023

Ballarpur Institute of Technology | CGPA: 8.54

CERTIFICATIONS

- Introduction to Cybersecurity - Cisco Networking Academy
- Cybersecurity Job Simulation - Mastercard
